The Effect of a Shared Governance Model on Professional Control and

Governance

Presented by Allison Fitts, RN, CMSRN

June 1, 2023

Study Overview

- Catholic Health Initiatives St. Vincent Hot Springs (CHI SVHS) implemented an interprofessional shared governance model in 2017.
 - This is best practice for creating a healthy work environment for nurses and other healthcare professionals in the acute care setting.
- As the hospital continues to strive toward excellence, the goal is to continually increase professional control and governance of the clinical employees.

Research Team

- Angie Longing, MHSM, BSN, RN, NE-BC (Pri Investigator)
- Laura McAnally, BSN, RN, RN-BC (Site Inves)
- Allison Fitts, RN, CMSRN (Co-I)
- Teresa Lambert, MBA, BSN, RN (Co-I)
- C.J. Newton, MSN, RN, NE-BC (Co-I)
- Pamela Ashcraft, PhD, RN, PHCNS-BC (Co-I

Study Aim

The purpose of the study for this site was to exemployee perceptions of professional governand revise the shared governance model, if ne examining the results to increase clinical employerception of professional control and govern

Study Design

The study used a longitudinal, quasi-experimental design. The *Index of Professional Governance 3.0* (IPG) survey tool (Hess, 2017) was used to measure professional governance on a continuum range from traditional to shared to self-governance.

The research questions for this study included:

- What is the perception of governance in employees currently and in three years?
- What is the perception of governance according to the six dimensions of governance outlined in the Index of Professional Governance 3.0 tool (Hess, 2017)?
- How do the six dimensions of governance vary over time?

Sample Description

Employees at CHI SVHS that provide clinical can nursing care, were invited to participate. If any received by participants who are not a part of population at CHI SVHS, their responses were

Location of Study

The research study took place at CHI St. Vincent Hot Springs.

Discussion

CHI SVHS falls into the Shared Governance do categories - Overall, Personnel, Information, R Participation, Practice, and Goals.

While CHI SVHS scored very high in these cate will continue to be to get as many employees share their ideas in decision making wheneve best practice for creating a healthy work envir nurses and other healthcare professionals in 1 setting.

CHI SVHS will continue to monitor the employ on shared governance and for any opportunit employees to get their voices heard.
