<p>ACNO/VP PCS Report Out Teresa Lambert</p>	<ul style="list-style-type: none"> • Joint Commission visit <ul style="list-style-type: none"> ○ Teresa stated that she is proud of the work we do in our hospital ○ 31 items, none in red ○ Action plans were prepared for the items ○ Joint Commission does not have to make a follow up visit for any conditional findings ○ Everyone was very engaged with the inspectors • Evaluations <ul style="list-style-type: none"> ○ Coming up in July 	

	<ul style="list-style-type: none"> • Peer evals <ul style="list-style-type: none"> ○ Computer evaluation is only 2 questions, must be done to receive merits ○ The other piece of the evaluation will be done on paper ○ A meeting with NM's will be held this afternoon to go over details ○ You have to do your peer evaluations before your own ○ Paper evaluations are anonymous • Update on CSH SE division <ul style="list-style-type: none"> ○ Going from 7 to 5 divisions, not announced yet; we will probably partner with another division • Nursing Annual Summit <ul style="list-style-type: none"> ○ Valuable information is obtained with the Nursing Strategic Plan • Nurse's Day feedback <ul style="list-style-type: none"> ○ Great feedback, some Practice Council members had their socks on today • Scrub survey <ul style="list-style-type: none"> ○ Uniform shop - internal yard sale to get rid of old stock ○ Stephanie will order demo sizes of the top 3 to 4 brands from the survey: Figs, Cherokee, Healing Hands, and Koi. You try them on and then we'll order your size. • Salad bar <ul style="list-style-type: none"> ○ Everyone was pleased to have this back as an option ○ Today they are testing badges to see if they are working again ○ Tim will get with Jeff Irwin to ask about bringing back the Angel Deal (a less expensive, but fixed meal option). • BP cords <ul style="list-style-type: none"> ○ Do not throw away, we've had to replace nine already ○ The cords need to stay connected to the machine, so please wipe and reuse ○ These are the only cords that work on the new cuffs <p>Discussion Teresa Moore - we even zip tied them to the machine. Ann - When you have a critical patient, and you're trying to get them transported, and they're all hooked up, it's hard to dig in there and take all of those cords off and put all new ones back on</p> 	<p>Motion made by Ann to switch to alligator clips vs the buttons. Logan seconded. Motion passed unanimously.</p>
--	------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	-------------------------------------------------------------------------------------------------------------------

	<p>just to change the one cord, it's harsh on their skin. Teresa asked if there was a better recommendation on how to do it. Ann - the worst to trade out are the cardiac monitors because stickers are hard on their skin. Alligator clips instead of the ones that press on and cords that disconnect at the hub. So you could disconnect that and leave the leads on the patient. Renee will check on it.</p> <ul style="list-style-type: none"> ○ Workplace Violence Council <p>Motioned to invite Phillip Petty every 6 months to report on safety, all were in favor.</p>
