CHI St. Vincent SVHS Detox and Residential Positions

S- CHI SVHS is working to open an Addiction Recovery Unit. The Unit will be composed of detox and residential unit.

B- CHI SVHS community needs assessment revealed the largest number of opioid use, as well as, other substance abuse issues on the rise within our community. This unit will serve as an integral way to serve a vulnerable patient population in our ministry. The unit has been renovated by a private donor to meet the needs of the patients and unit.

A- This unit will serve to positively impact the lives of those that have an addiction to substance abuse and will allow growth within our organization. The positions that have been requested are required positions, in order to open the unit.

R- I recommend the new positions be approved in order for growth for our facility and serve a vulnerable patient population. Without approval of the positions, we will be unable to open this unit.
